DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to Vanzieleghem et al. and Sykes have been considered but are moot in view of Carling reference of record.

Applicant's arguments filed January 28, 2002 have been fully considered but they are not persuasive.

Applicant's attention is drawn to Carling reference on page 6, lines 21-30, where it teaches the suitable daily asthmatic dose of formoterol and budesonide within Applicant's daily dosage of "on demand" and the dosages strongly depends on the patient (age, weight etc.), severity of disease (mild, moderate, severe asthma etc). Applicant's attention is also drawn to Carling reference on pages 7-9, where it exemplified the amount of active agents per dose of inhalation. With exemplified amounts per inhalation, the asthmatic patient is able to inhale upto little over 8 inhalations maxium per day. Although the Carling teaches the preferred regimen as twice a day, it is obvious that the exemplified composition can be inhaled up to 8 inhalation per day without going over the maximum daily dosage. Therefore, it would be a motivation for a skilled artisan to instruct those severe asthmatic patients who may need extra

Art Unit: 1617

doses when needed since the dosages strongly depends on the patient and severity of disease. Further, it is a motivation to skilled artisan to instruct severe asthmatic patient to use on demand or as needed bases since it is safe to administer extra doses up to 8 inhalations as taught by Carling's wide therapeutic range for fast asthmatic relief.

Applicant has not demonstrated or set forth any reason for the criticality of these instructions. Applicant's inventive feature is instructing patent to inhale "on demand".

For these reasons the claimed subject matter is deemed to fail to patentably distinguish over the state of the art as represented by the cited references. The claims are therefore properly rejected under 35 U.S.C. 103.

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened

statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
